61	What happens after we receive the disk?							
62	1.	Check to see that your Customer number(s) is/are on file.						
63	Remember, for each file you can request a different Customer number for each correspondence address, i.e.,							
64	one for correspondence address, a different number for address for practitioner(s) of record, and							
65	another number for fee address, or one number can be used for two of the three or one of the three.							
66	However, you must apply for the numbers before submitting your disk.							
67	2.	After confirmation of a valid customer number(s), the data is uploaded to the database on the mainframe.						
68	3.	Change of address letters will be generated for each application number and/or patent number accepted.						
69	Acceptance occurs if the number(s) and corresponding date(s) match those in our database. The							
70	letters are filed in the application or patented file with the new Customer Number annotated on the file jacket.							
71	4.	A 2 part report is also generated. The first part lists application and/or patent numbers not updated for failing						
72	the system edits. You should review information provided, make corrections and submit a new disk with							
73	correct information. Send to box CN, Washington, DC 20231. The 2nd part of the report lists all applications							
74	updated to reflect the customer number as designated. Please review carefully, paying close attention							
75	to the "OLD" first line of address printed. If not familiar, it may be that you updated another customers file							
76	with your customer number. Please notify the Patents Electronic Business Center, in writing, of any files not							
77	associated with you or your firm but were updated with your customer number.
